Libraries Personal archive Compact archives Compression software Archieve (.rar) is a computer file format that was developed by Eugene Roshal and the Free Archive Tools Team. Rar-files (.rar) may be created by several freeware and shareware tools, such as WinRAR, PKZIP, StuffIt, 7-Zip, WinZip, WinRAR, Stash and several others. Some.rar files are created by a special RAR program that is not a standard compressor, like the Standalone version of 7-Zip. .rar is also a part of the RAR Multimedia Codec package, and the.r00.r01.r02.r03.r04.r05.r06 format is used for.rar files, to define where the data of the file is stored. .rar is a container file format, which makes it possible to store multiple file archives (often called.rar archives, or just.rar files) in a single file. It is not a file format itself. .rar files can be compressed as well. They contain information
