Figure 1. AutoCAD was introduced in 1982 as a desktop application. AutoCAD is easy to learn, with just a little instruction. Anyone can use the application without prior training. The user interface is friendly, simple to use, and most commands can be performed with just one keystroke. AutoCAD can also be used for non-CAD purposes, such as drawing specialized diagrams and engineering drawings. Although AutoCAD is a commercial product, it is also used in the free and open-source software community. The product is still manufactured, used, and supported by the Autodesk brand, but the source code is available for free download on the company's website and is available to anyone who wants to modify and redistribute it. For most features of the native AutoCAD platform, an API can be used to access these features from any language, using a COM wrapper. Interoperability AutoCAD supports communication with other CAD programs, via OLE, Interdev, Printer Command Language (PCL), .NET, Java, and Visual Basic. Interdev is a communication protocol developed by Intergraph and often referred to as Interdev. Interdev is based on a very simple and short ASCII file format containing two types of elements: Graphic elements such as points, lines, surfaces, arcs and text. Data elements containing numbers or values (such as dimensions, coordinates, dimensions, text etc.) OLE is a Microsoft term for a technology introduced in Windows 3.1 to allow running different types of software within the same windows. OLE is the basis for AutoCAD's XML output, which allows transferring data to other products such as word processors and databases. .NET is a framework that enables native development of software for the Windows platform. The program must be written in Visual C++, Visual Basic, or a version of the Mono programming environment. .NET includes a COM wrapper for AutoCAD, allowing it to be used as a component. Java is a computer programming language that is generally designed to be cross-platform. Java programs can be run on a wide variety of computers and on devices ranging from desktop and laptop computers to mobile phones, tablets, game consoles, and television sets. Visual Basic is a BASIC-like scripting language that can be used for rapid application development. Visual LISP is an object-oriented programming language, designed to allow a very high level of programming within the familiar Windows environment, using a drag and drop GUI environment. VBA is a scripting language that can be used with Microsoft Office, allowing for user created macros and functions. File formats AutoCAD is primarily a CAD program, but in addition to standard CAD file formats such as .DWG, .DXF, .PDF, .DWG, .DLT, and .DXF, it can read other formats such as: GraphML DXF CADT aii VisuLISP STL X_DWG AutoCAD also has the ability to convert to, and import, various file formats: X_DWG DXF CADT aii VisuLISP STL Autodesk a1d647c40b

So basically, I have a MySQL table that looks like this id | option | date ----- 1 | First | 2012-10-26 2 | Second | 2012-10-26 3 | Third | 2012-10-26 I have a form that allows users to choose one option at a time. My query looks like this: \$result = mysql_query("SELECT * FROM votes WHERE option = '" . \$_POST['option'] . "' OR option = '" . \$_POST['option'] . "' OR option = '" . \$_POST['option'] . "'"); It isn't working. I need the query to check if there are any records with the same option. For example if the user selects option 2 and option 1, my query should match record 2 with record 1 and record 3. Thanks in advance A: If all you want is to find records with the same option, you can simply do: SELECT * FROM votes GROUP BY option; Note that this will return multiple rows with the same option value, unless there is no other option selected. If you only want one, then use DISTINCT in your SELECT: SELECT DISTINCT option FROM votes; A: I think you need to group by the options to get distinct options SELECT * FROM votes GROUP BY option; Friday, October 12, 2011 Greenlee College Students Honor Parent Lauren Gilbert at Gala Lauren Gilbert will always be remembered for being a local hero.
