

Customer Info Manager Pro Crack License Code & Keygen For PC

Customer Info Manager Pro Crack [Mac/Win] (April-2022)

Customer Info Manager Pro is an easy to use program that will assist you in managing customers. It is designed to get all customer contact information, and generate reports for customer contacts. It also comes with an option to make backups for the contact database. For your information, a contact can have as many categories as you want. Now you can import an Excel file with the help of a template. You can also export your contact database in PDF or XLS format. It comes with a powerful search function that can help you find any contact easily. Furthermore, you can upload a variety of files. It has a powerful report generation function that will help you create different reports. It allows you to make backups for the contact database. It can open BKP files, and export them into PDF or XLS formats. It has a header and footer, which can be used to add logo and fonts, and to change their sizes and colors. Customer Info Manager Pro is a sophisticated and approachable program designed to offer an efficient method of managing customers, generating different reports, and backing up the database. The app keeps track of customers information like the address, phone numbers, fax, email, date of birth. It's wrapped in a well-structured and modern layout with an organized ribbon bar where all necessary features may be accessed. Multiple themes are supported. Insert data about multiple clients From the main menu, a new customer can be added with information fields like full name, address, entry type (person or company), category (e.g. gold, silver, bronze), country, or state. In addition to these, city, various phone numbers, e-mail addresses, gender, product groups and items can be filled in. Unfortunately, there is no option to assign photos to contacts. Other categories could have provided more details like the amount of merchandise, price, short description, or a descriptive photo. Find and back up files, and manage reports The search function offers filters such as name, address, state, zip code, or email. It's possible to add as many categories as you want like company, city, product, production, or create a unique one. From the menu, you can insert a header and footer with the aid of an editor pad. A broad range of formatting elements are available, like font types and styles, colors, bold, italic, and paragraph alignment (e.g. left, right or center). In addition, content can be copied, cut and
