Mutations of the sigma-70 gene of RNA polymerase in Salmonella typhimurium are essential for bacterial growth. In Salmonella typhimurium three sigma-70 genes of the RNA polymerase were identified. One of these sigma-70 genes, sigma-70, is essential for normal bacterial growth, whereas the other two non-essential sigma-70 genes, sigma-24 and sigma-33, seem to be required for transcriptional regulation of the sigB gene. In order to obtain single mutants of sigma-70, sig 55cdc1ed1c
