The “One-to-Watch” feature marks the most significant change in the popular Ultimate Team mode since its introduction in 2014. Coaches now have a new way to recruit and manage players to build their own dream teams. As both player stats and Ultimate Team player ratings improve with every game played, the “One-to-Watch” feature will give coaches a new way to improve their teams. With the On-Field Player Profile, players can now see and compare their stats with the stats of similarly rated players around the world. The new presentation engine in Fifa 22 Cracked 2022 Latest Version will also add an ultra-realistic look to the pitch, with a new “Match Day Presentation” mode that makes the stadiums, players and pitch designs all come to life. It's a concept known as "Map of the Earth's Surface" developed by SokoReko. The interactive map features a color gradient that marks the elevation from sea level to 67 kilometers (41 miles) high, on the 7,887,668 square kilometer (2,897,451 square mile) surface. The mapping team also used the GPS and OziExplorer data provided by the United States Geological Survey to determine the elevation of each point. The animation above shows the movement of the sun across the globe at different times of the day. Its path is based on the coordinates provided by the USNO's Sun Coordinated Time (UTC). The animation also shows the shadow length at different times of the day, which is based on the UTC Coordinated Universal Time (UTC-4). The map has been encoded with a level of accessibility granted by the W3C standards, which indicates the viewport of the map is 360x180. If you're looking for a map of the whole Earth, check out the official one from NASA. ► Map of the Earth's Surface [SokoReko via The Verge]
